iPad Functions

General

- Wi-Fi Network
- Side Switch
- Airplane Mode

The iPad screen shows the General settings menu. The "Airplane Mode" switch is set to "Off". The "Network" section is circled in red. The "Restrictions" section is also circled in red.

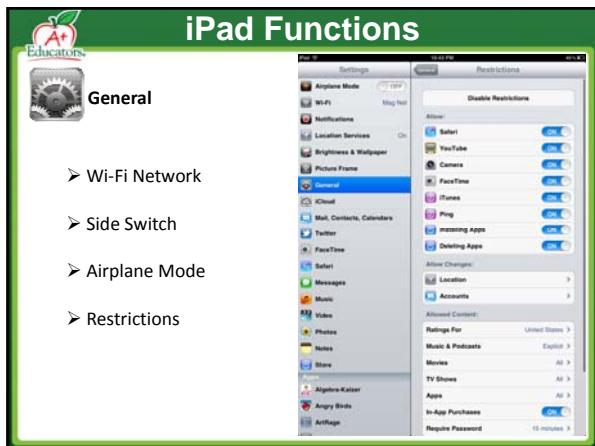

iPad Functions

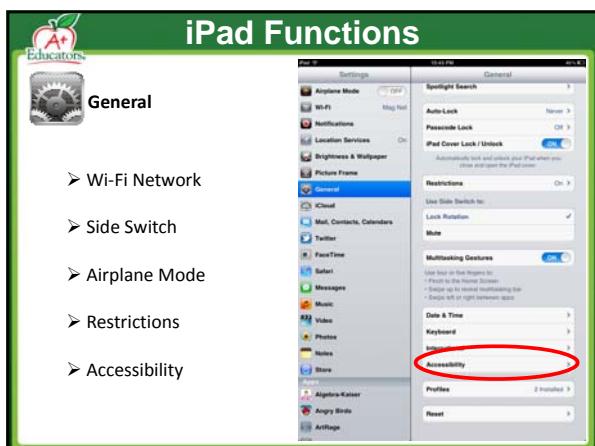

General

- Wi-Fi Network
- Side Switch
- Airplane Mode
- Restrictions

The iPad screen shows the General settings menu. The "Restrictions" section is circled in red.

iPad Functions

The screenshot shows the iPad's General settings screen. On the left, there is a sidebar with icons for various settings like Wi-Fi, Side Switch, Airplane Mode, Restrictions, and Accessibility. The main area shows the Accessibility settings. The "Speak Selection" option is circled in red.

iPad Functions

The screenshot shows the iPad's Accessibility settings screen. The "Speak Selection" option is turned on (set to "On"). Below it, there is a news article about a super moon, and the text is being spoken as it is selected.

iPad Function

- Use the Reader function in Safari to narrow down the distractions

The screenshot shows the iPad's Reader view of an article by Neil deGrasse Tyson. The interface is simplified, showing only the text and images of the article, which is about the tidal force.

iPad Functions

Notifications

- Manage your apps that push data, don't let them manage you!
- There are going to be some apps where you want instant notification - think news or calendar items.
- There are some apps that you might want to check out on your own time - think games.
